

HARIPRAKASH BASKAR

QA LEAD | SDET

+91-7598046021 | hariprakashbaskar96@gmail.com

■ PROFILE SUMMARY

QA Automation Lead with 7+ years of experience in Banking, Insurance, Healthcare, and Capital Markets domains. Expertise in Playwright, Python, Pytest, BDD (Pytest-BDD/Cucumber), Selenium, API Testing, and UiPath Test Suite. Experienced in designing automation frameworks, leading QA teams, driving Agile delivery, and implementing AI-driven Quality Engineering solutions using Devin AI and Generative AI. Claude and ISTQB Advanced AI Testing certified professional with strong stakeholder management and leadership experience with Canadian master degree and 4 years of onsite experience with Permanent resident of Canada.

■ TECHNICAL EXPERTISE

- Designed, developed, and maintained scalable automation frameworks using Playwright, Python, Pytest, BDD (Pytest-BDD/Cucumber), and Page Object Model (POM) architecture for enterprise applications.
- Led Quality Engineering initiatives across multiple Agile teams, driving automation strategy, test planning, estimation, release readiness, risk assessment, and stakeholder communication.
- Architected CI/CD-enabled automation solutions integrated with GitHub Actions, Azure DevOps, Jenkins, and Git-based workflows to support continuous testing and faster release cycles.
- Acted as QA Lead and Scrum facilitator, collaborating with Product Owners, Business Analysts, Developers, and senior stakeholders to ensure quality delivery and alignment with business objectives.
- Established automation best practices, coding standards, framework governance, code review processes, and mentoring programs to improve team productivity and automation maturity.
- Strong experience in API Testing, test data management, defect triage, root cause analysis, requirement traceability, and validation of complex business workflows across Banking, Insurance, and Healthcare domains.
- Leveraged AI-driven Quality Engineering practices, including Generative AI, Devin AI, intelligent test case generation, and automation optimization techniques to improve testing efficiency and accelerate delivery.

■ WORK EXPERIENCE

Senior Test Engineer at Ascendion Engineering

Feb 2024 - Present

- Part of a team of Quality Engineering professionals and Quality Circles are involved in setting up the framework from scratch.
- Led the design and implementation of a scalable Playwright-Python automation framework from scratch, leveraging Pytest, Page Object Model (POM), and BDD principles to improve automation maintainability and reusability.
- Served as Functional QA Lead for Auto Loan and Capital Market applications, driving test strategy, automation planning, defect management, and release quality.
- Developed and maintained automated UI and API test suites using Playwright, Python, Pytest, and REST API validation techniques.
- Integrated automation frameworks with CI/CD pipelines using GitHub Actions, enabling automated test execution, reporting, and faster feedback during code deployments.
- Implemented BDD-based automation practices using Pytest-BDD, improving collaboration between Business Analysts, Developers, and QA teams through business-readable test scenarios.
- Collaborated with global cross-functional teams including Product Owners, Business Analysts, Developers, Architects, and Project Managers to ensure quality delivery of enterprise applications.
- Utilized Azure DevOps, TFS, Jira, Confluence, GitHub, Power BI, and Power Apps for Agile project delivery, test management, reporting, and release governance.
- Evaluated and explored Generative AI and Devin AI capabilities to improve test case generation, requirement analysis, and automation productivity within Quality Engineering initiatives.
- Contributed to the establishment of Quality Engineering best practices, automation standards, coding guidelines, and framework governance across multiple delivery teams.
- Mentored QA engineers on Playwright, Python, BDD, API Testing, automation framework development, and Agile testing methodologies.

- Participated in hiring, technical interviews, onboarding, performance reviews, and capability development initiatives for QA team members.
- Championed Agile transformation initiatives by driving shift-left testing, continuous testing, automation-first approaches, and quality engineering excellence across projects.

QA Project Manager at Bayshore Healthcare

Oct 2022 - Feb 2024

Project Name: CRM Dynamics 365 | **Role:** Software QA Lead - RPA Analyst

Skill Set: UiPath, Test Manager, Orchestrator GIT, Jira and Zephyr, JMeter

Responsibilities

- Analyzing the User Stories and planning the User Stories to be completed in the Sprint.
- Test manually and identify the defects in different testing Environments.
- Check the module feasibility and analysis the automation scope.
- Understanding the requirements and Writing Test cases and Test scenarios for Manual and Automation Testing as per the acceptance criteria of the user stories.
- Generating reports using JMeter (Concurrent Users)
- Updating Test cases in Test Case Management Tool JIRA Xray.
- Writing Automation Test Scripts for Automation Testing using Taiko automation tool with Gauge BDD Framework.
- Participating in all the agile ceremonies - Sprint Planning, daily scrum calls, Sprint review, Sprint retrospective, Demo.
- Generating Automation reports and analyzing them using Test Manager in Ui Path

Technical Lead at Cognizant Technology Solutions

Oct 2021 - Oct 2022

Project Name: Biogen | **Role:** Testing Analyst/Validation Lead

Skill Set: UiPath Studio, Test Manager, Ui Path Assistant, Orchestrator, ServiceNow Automation Module,

Responsibilities

- Conducting Sprint Calls for various projects and engaging Dev, DevOps, Support and TCOE Team
- Test Lead for ServiceNow Application, SME in Change, Incident and Problem Management
- Test Lead for ServiceNow Infra Application
- Communicating with Stakeholders and test data and environment set up for UAT Execution
- Participating in UAT execution for Knowledge (Non-GxP) and Incident Modules (GxP)
- Documenting the Test Plan and Test Strategies, departures in Test Summary Report
- Preparing both Pre- Execution and Post Execution Traceability Matrix
- Lead the team of QA Testers offshore
- Creating IQ, OQ, PQ test set and Release Cycle and setting up the environment for SIT Testing
- Analyzing Defect and allocation to the Development team, informally re-resting once defect is closed
- Preparing Documents as per Life Science SOPs and referring appropriate ITPD for following GXP projects
- Attending Client meetings as Validation Lead, to follow the GDP process.

Software Test Analyst - Cognizant Technology Solutions

Nov 2017 - Dec 2019

Project Name: Biogen (Offshore) | **Role:** Test Engineer

Skill Set: HP-ALM, HP QTP

Responsibilities

- Analyzing the User Stories and planning the User Stories to be completed in the particular Sprint.
- Test manually and identify the defects.
- Daily schedule the run batch in selenium for testing.
- Developing BDD test using Cucumber.
- Uploaded test cases in JIRA and Executed test cases and logged defects.
- Performed Functional and Regression Testing.
- Attend Defect triage call with developers and solve the issue soon.
- Defect logging; tracking in Test Management tool using JIRA which were found at execution time.

- Participating in all the agile ceremonies - Sprint Planning, daily scrum calls, Sprint review, Sprint retrospective, Demo, Rewards and Recognitions.

■ EDUCATION

ANNA UNIVERSITY

Bachelor Of Engineering

AUG 2013-MAY 2017

UNIVERSITY OF GUELPH

Master Of Engineering

JAN 2020-MAY 2021

■ CERTIFICATIONS

PMP Certification from PMI

FEB 2023

ISTQB Foundation Level

MAY 2015

ISTQB - Advanced AI Testing

OCT 2024

Advance Digital Transformation - Indian Institute of Management- Ahmedabad

NOV 2025

■ AI COMPETENCES

CMD Assist (Conversational Command Assistant):

Developed an AI-driven assistant to interpret and execute natural language commands, automating repetitive developer and system tasks through intelligent command generation and contextual understanding.

SQL Assist (Natural Language to SQL Generator):

Built an AI model that converts natural language prompts into optimized SQL queries. Integrated schema understanding and validation to ensure accurate and efficient data retrieval for business analysis.

Test Case Optimizer (Agentic AI for QA):

Designed an Agentic AI solution that analyses release notes and test case repositories to automatically identify relevant regression test cases, prioritize execution, and perform AI-driven gap analysis to enhance test coverage and reduce effort.
